

Editor's Comment:

The manuscript has been revised and corrected corresponding to reviewers' comments. However, I still have comments and minor revisions before the acceptance for the publication.

Comments:

1. Toxic effect of herbicide on wheat plants for the period of growth stages after emergence should be described.
2. When herbicides are applied for weed control, the toxic effect of herbicide residues in soil on crops is indispensable issue and should be assessed.
3. Synergistic effect of aminopyralid and florasulam was assessed in this study. The results of a single treatment of these herbicides should be also described.

Minor revisions/corrections:

1. ABSTRACT, L9: (C.Diluta) is changed to (C. diluta)
2. ABSTRACT and others: (C. diluta density reduction), (C.diluta height reduction) and (C. diluta biomass reduction) is changed to (reduction of density, height and biomass in C. diluta)
