

Editor's Comment:

1. The Title is not appropriate. Mitigation is not suitable. Ill-effects should be replaced by Adverse effects. It should follow Sentence Case.
2. Reference should not be added in Abstract
3. The time of the research is not clearly stated.
4. Materials and Methods; and Results and Discussion is not well written.
5. References are not written well.
6. The Authors did not follow the guideline.

However, the manuscript can be accepted after the corrections.
