

Editor's Comment:

I have gone through the original manuscript and revised version of manuscript along with the reviewer's feedback.

Overall, there are a lot of mistakes throughout the manuscript therefore I will recommend the major revision.

1. There is no proper literature review.
 2. Not updated references.
 3. Lack of novelty
 4. Results interpretation are missing, and also there is no SEM and significance.
- so I would suggest authors to re-write the manuscript and cite the proper latest references.
