

Editor's Comment:

In general terms the manuscript: RE-ESTABLISHING NEW NORMALITY AS WE RETURN TO ORTHODONTIC DEPARTMENT should have a revision.

I ask regarding the table placed at the end:

Treatment Protocol (Fig 11) 14

I do not understand why they placed it, since it is not referred to in any paragraph.

In fact, this observation was also made by Dr. Allesandra Areas. The authors should remove this last table.

The suggestions made by the reviewers are intended to improve the quality of the article.
