

Editor's Comment:

This is a very good and useful paper. However some minor revisions are required to process further for publication. Once this revisions are made it can be published soon.

For eg in the abstract - numbering of objective is not required.

In the introduction 2nd para - 2nd line and 3rd line hve some grammatical mistake in framing the sentence

Introduction last paragraph - 1st line required to be checked

In results - speciality(pharmacy))
