

**Editor's Comment:**

I have checked the submitted paper, entitled  
"Dance Movement Therapy: Is there scope in Modern Medicine?".

The paper is well written.  
Although I agree with the referee Sel, who suggested adding some  
photos of dance therapy.  
It however depends on the authors.

I however am wondering about the category of the paper.  
The authors submitted the paper as a Review Article.

Home page of the journal says as follows.

4. Review papers:  
These papers will not have empirical data acquired by the authors but  
will include discussion of papers published and data acquired in a  
specific area. We advise a length of 5000-9000 words, (including  
50-150 references plus 3-5 figures and/or tables (if required)).

The length of the submitted paper is less than 3000 words, including 27 references.

I think the paper should rather be published as 3. Short communications or 5. Minireview papers.
