

**Editor's Comment:**

I am of the opinion that it would be appropriate to publish it, provided that my recommendations below are taken into account:

- 1- There is no data on antibiotic resistance in this study. Therefore, I think it would be correct to put an appropriate title reflecting the current work.
- 2- There is no need the column of total in Table 1.
- 3- Generic names of drugs should be written instead of trade names (Figure 1).
