

Editor's Comment:

I have carefully read the manuscript, entitled "**Small scales dynamics inferred from tidal measurements to mitigate daily floodings in the city of Douala: Case study of the Besseke's Flood drain**". The reviewers have commented on this paper and the author's replied against the comments. I ask authors to:

- 1- Improve the language of the manuscript as there is some typo mistakes for instance method developed by [17] in page 9.
- 2- Justify the format and the font of the equations before the article can be considered for publication in **Journal of Geography, Environment and Earth Science International**
