

Editor's Comment:

The final decision for manuscript number 2019 JEAI 49405 entitled 'The effect of air dried leaf powder and burnt leaf ash of different plants on root-knot nematode (*Meloidogyne* spp.) on okra (*Abelmoschus esculentus* L. Moench)' written by Nnadi OF, Ononuju CC, Ikwunagu EA, and Orikara CC

Although, the Authors did not improved statistical analysis of the results, I accept their response. Nevertheless, the manuscript still needs revision. The manuscript still is not prepared according to the journal requirements. The paper template is available at <http://www.journaljeai.com/index.php/JEAI/about/submissions> in the General Guideline for Authors. The manuscript must be prepared according to these requirements. The most important corrections needed are numbering of sections and subsections, Competing interests and Authors' contributions, and appropriate style of literature cited. Additionally, keywords must be changed, because keywords should not be the same as words used already in a title.

My decision is: Accept after adjusting the manuscript to the requirements of the Journal.
