EDITORIAL COMMENT' S on revised paper (if any)	Authors' response to editor' s comments
1. The author added in part the suggested send by reviewers. On my opinion, the manuscript cab be improve, I suggest that the tables and figures be more informative. In addition, it is necessary to improve the discussion and be more informative in the part of the statistical analysis (the data were subjected to the tests of normality and homocedasticity of variances ...)	The discussion has been improved upon and other corrections have been effected.
