<ol style="list-style-type: none"><li>1. <b>The grammar is so poor that the manuscript is difficult to be read.</b></li><li>2. Please revise the grammar errors before further management.</li><li>3. <b>Percentages in Table 3 do not sum up to 100% in each subgroups. E.g. age &lt;55 19 (52.7) / &gt;55 17 (47.3). Please amend.</b></li></ol>	<p>The grammar has been revised and corrected</p> <p>3). Table 3 was an Analysis done for 106 patients and the percentages are across rows for groups. For example, a total of 30 females were analysed among whom 12(40%) had TAPE i.e <math>(12/30)*100</math>. It gives you proportion of a sub group that had TAPE. The same applies to the age - the percentages represent the proportion of those within that age category that had TAPE. The same also applies to all the other subgroups.</p>
