EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>Manuscript title: Bigi Soft Drinks induces hyperglycemia and hyperlipidemia in Wistar rats.</p> <p>The manuscript has multiple errors in the writing; an exact reviction of the writing in English is requested.</p> <p>Being a study conducted in rats does not require evaluation by the Ethics Committee but does require the bio-security consent of your institution. A letter of acceptance is requested by this Committee.</p> <p>There are many methodological errors, it only establishes the difference between drinks based on their flavor, but it does not clarify the concentration of glucose, sodium, fats, and other elements that are usually contained in the label of each product.</p> <p>The study has a local significance according to the cultural changes in the region.</p> <p>It requires major changes</p>	<p>That has been effected.</p> <p>This work wasn't carried out within my institution and I don't any committee with such nomenclature exist in my institution.</p> <p>The different composition of each drink has been included</p> <p>Major changes in what? All corrections requested have been effected.</p>
