EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>1. It has been improved slightly in the editorial process, particularly regarding grammar.</p> <p>2.I think the "work market" on p.110 should be called the labour market, in line with most of the literature.</p>	<p>In the new version we used to word labor market. This to be more in line with jargon of the field.</p> <p>The word comes from the time the word 'work' (for energy spent, as in 'newton-meter', or 'joule') was borrowed from physics. In those days work was labor and labor was work, having no other sources of energy. In those days economists borrowed words from physicists. Because in this particular case, the work was labor and most economists use this word, it fits better.</p>
