General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	From the medical point of view it is a much mentioned topic, however due to the robustness of the methods used, and the significant statistical support of its results should be accepted. It is well written and with a clear focus. The study allows modifications in public health on social determinants of health.	
Minor REVISION comments	The study makes it possible to detect the main problems that prevent action on the social determinants that cause disease, makes it possible to demand adequate public policies to act on inequities and increase health promotion programs.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
