PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>-Needs some minor revisions.</p> <p>-Some appropriate insertions have been made for the author's attention.</p> <p>-Fishbone diagram analysis delves into Cause-And-Effects Analysis. Per the figures illustrated (Figure 2 and 3) I don't see the "Effects" in the figures or how it has been liaised in the sections where you discuss the root causes. It would be appropriate if the authors could discuss the effects/implications of such causes.</p> <p>-Few references highlighted in red and others should be revised or corrected. Some annual reports cited must be referenced correctly.</p> <p>-Manuscript needs to be proofread entirely to check for grammatical errors/tenses, punctuations and so on.</p> <p>***Manuscript has been improved and ones the comments suggested have been incorporated, it can be accepted for publication.</p>
