PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I liked the article Immune thrombocytopenia in a case of severe congenital hemophilia A: a rare clinical scenario. I found this topic pertinent, since I had no knowledge of double hemostatic cases. The patient's case report is very well described in the text.	
Minor REVISION comments	In conclusion "The immune thrombocytopenia that develops in a case of severe congenital hemophilia A is a rare entity. However, as described in the present case, double hemostatic defects can coexist." In these cases of thrombocytopenia and hemophilia, can other symptoms coexist in addition to the ecchymptic spots? This is not the case.	
Optional/General comments	My general opinion of this article is that I really liked it, I found the topic very pertinent to this rare case of immune thrombocytopenia recently diagnosed in a case of severe hemophilia A.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
