SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Thank you for giving me to review your manuscript. This manuscript is interesting and scientifically meaningful for considering the stress from COVID-19. Regarding the contents, I have several suggestions.</p> <ol style="list-style-type: none"> 1. In the abstract, the study's purpose should be clarified more specifically related to the significance of the theoretical framework, especially the evidence gap. 2. In the introduction, there is no clear theoretical framework related to the research contexts to India. To make this study interesting for international readers, the background should include international situations related to Indian contexts. 3. In the introduction, again, the authors should add the gap in the evidence and research question for this research's consistency. 4. In the method section's measurement, the authors should clearly show the contents of their questionnaire as a table or in the text. 5. In the analysis section, the authors should describe which software was used for the analysis. 7. All tables contains the abbreviation, and it can be difficult for potential readers to understand for example, yes or no for what? The authors should add explanations as a footnote. 8. The discussion part should start with a summary of the results and outstanding points of this research. 9. Some English wording is not correct including the non-academic expressions. The authors should consult with native speakers regarding the wording. 	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i> Yes This article should contain the ethical consideration and the approval number of ethical committees.</p>
