PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	The manuscript is interesting for the researchers and growers of Pepper plants, especially those are using organic fertilizer sources. The current study is evaluating the response of sweet pepper (growth, flowering and fruit yield) under different fertilizer treatments: 10 t/ha of poultry manure, 300 kg/ha of NPK and 5 t/ha of poultry manure plus 150 kg/ha of NPK, compared to untreated control. Authors have given sufficient data on different vegetative growth parameters, flowering and fruit production as well as and logical discussion for their results. Authors have concluded that 10 t/ha of poultry manure increased plant height, number of leaves, leaf area per plant, flowering, bud appearance, number of fruits and average fruit weight. The paper is clear and the language is fine. The manuscript can be accepted for publication in Asian Journal of Agricultural and Horticultural Research
