PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Subject is not new and original. Manuscript is communicating new and important results. The subject is well stated in the introduction but introduction is very long. It should be shortened. The amount of data presented is not sufficient. It must be given yield and yield components. I am not aware of any errors in the calculations and the statistical treatment would appear adequate. The tables are not appropriate. The length is not appropriate. Discussion is not adequately discussed. Conclusion is absent It appears as though the authors have conducted a sufficient literature review. From my point of view, manuscript is able to publishing in Asian Journal of Advanced Research and Reports after major revision.	
Minor REVISION comments		
Optional/General comments		

PART 2:
