**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	There are significant flaws in the literature search. Author(s) have to consider that over 300 patients with the rare e1a2 transcript have been reported in an international study coordinated by Michele Baccarani (Leukemia 2019 DOI: 10.1038/s41375-018-0341-4), even though in that study response to therapy is not reported. Other authors (Gong et al. Blood Cancer J 2017, Xue et al. Leuk Lymphoma 2019) have reported 20-40 p190+ CML patients, the majority of them treated with TKI. Some sentences in the discussion ("no molecular remission with frontline imatinib therapy", "ONLY ONE patient with p190+ CMI showed excellent response") are inconsistent with the literature and have to be revised accordingly.	
<b>Minor</b> REVISION comments	Please report differential CBC count at diagnosis, and comment on monocyte count, is available.  Please provide details about the method used for mutational analysis	
<b>Optional/General</b> comments	Author(s) are not native English. Grammar and spelling should be checked throughout the manuscript.	

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	(If yes, Kindly please write down the ethical issues here in details)
