

SDI Review Form 1.6

Journal Name:	Asian Journal of Case Reports in Medicine and Health
Manuscript Number:	Ms_AJCRMH_60872
Title of the Manuscript:	COVID-19 Patient Associated with Rare Pneumatocele Finding: CT Features and Case Report
Type of the Article	Case report

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>According to my opinion, the pneumotorax and pneumatocele in covid patients are not so unusual. In particular, I don't find any innovative or distinguishing data. I suggest to improve some data by:</p> <ul style="list-style-type: none"> - insert chest XRays (CXR) image vs CT scan to sustain your opinion of low CXR sensitivity in diagnosis - insert lab test exam → table - more details about eventually CPAP therapy / chest dranaige. - has the patient any positive cultural exam? Blood/urine/escreato??? 	
Minor REVISION comments	<p>I suggest to improve some data by:</p> <ul style="list-style-type: none"> - insert chest XRays (CXR) image vs CT scan to sustain your opinion of low CXR sensitivity in diagnosis - insert lab test exam → table - more details about eventually CPAP therapy / chest dranaige. - has the patient any positive cultural exam? Blood/urine/escreato??? <p>Many pneumatocele depend to infection.</p>	
Optional/General comments
