**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Obturator hernia in male patient is a rare entity which is uncommon to see, inguinal hernia is very common in males and routinely they are undergoing surgical procedures for its repair. In future surgeons after reading this case report they will keep in mind this rare entity while performing surgery for left inguinal hernia	
<b>Minor</b> REVISION comments	In my opinion in this case report benign prostatic hyperplasia is under discussion which need to be readdressed as a lot of investigation were done for it as it was a case of intestinal obstruction.	
<b>Optional/General</b> comments	A well written case report with good selection of words, concept and importance of case which will helpful in future surgeons.
