PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>Few references and old. In abstract: Aim: To evaluate the efficacy of transcutaneous electrical nerve stimulation (TENS) over the whole salivary flow rate in normal healthy adults. But WHY? What scientific support? Specify indications What the aim in ethical issues? If <i>palliative treatment</i> and so on, a specific mention is opportune. Also for diseases that may have utility from this method. And meaning of <i>as well as prevention of oral complications</i> . How long this effect? AA. write that <i>provides only momentary relief</i>. What utility?</p>	
Optional/General comments	This work may be interesting, but it need more scientific notices.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
