

SDI Review Form 1.6

Journal Name:	Asian Journal of Fisheries and Aquatic Research
Manuscript Number:	Ms_AJFAR_60650
Title of the Manuscript:	Addition of Mackerel Fish Head Flavor Powder to Cilok's Preference Level
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. About Data Analysis, it is necessary to comment briefly on the validation of the theoretical and statistical assumptions to use this Friedman test. 2. In this sense, it should also be commented in a general way regarding the Bayes test used and the fulfilment of its theoretical assumptions. 3. On Results and Discussion It is important to elaborate more on the differentiation between treatments 6 and 7, because their measures of central tendency (median and average) in each of their factors, parameters and criteria reflect a certain similarity, which is also observed in the proximity of the calculated values (Alternative value and Priority value) shown in Table 4. 	
Minor REVISION comments	<ol style="list-style-type: none"> 1. The description of the Friedman test in Subsection 3.2.2. it can be shortened and synthesized in such a way that it only shows the elements most important to the reader's understanding and reading. 	
Optional/General comments	<ol style="list-style-type: none"> 1. The review and consideration of articles and textbooks specialized on nonparametric methods applied to food sciences from prestigious scientific journals and publishers would further enrich the application of statistical methodology in this type of manuscripts.
