PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The work is well elaborated, presents a very understandable English following a basic methodology of scientific works.	
Minor REVISION comments	I suggest those revisions. In Fig 1, coordinate points should be included on the map (Latitude and Longitude). This will make it easier for the reader to identify where the studied area is. Another suggestion on Figure 1 is to include a map of Romania with the location of the areas in Fig 1. The Map of Romania could be small and placed in the upper left corner of Fig 1. As I don't know the area, I had to search the internet to locate myself. I also suggest, if possible, to include the toponymia of the photos on the postcards, the name of the mountain, the valley, the farm, the ski resort etc. This would give more weight to the work because the reader could identify the location.	
Optional/General comments	The work is well presented.
