**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>It is an important article to describe the FNSA in the specific population. The following few comments:</p> <ul style="list-style-type: none"> <li>- Adekoya's findings are essential to the paper since the study was performed in Negeria. However, it is not clear, when you discuss Adekoya's findings (in Discussion paragraph 1). The number of 132 is not the same as in the Table 2. And it is not matched when you cited that with no 11 that referred to the Tahir's study. Also in the paragraph 5 of the discussion.</li> <li>- Please make sure that the name of table/figure correctly (such as "see table 2" should be Table 2) and unnecessary punctuation such as "Caucasian?" in Discussion paragraph 2.</li> <li>- In the conclusion part, you mention that "We hope that the implant manufacturing companies factor this knowledge into account during the production of prostheses and hip implants for use in the treatment of surgical pathologies of the hip". I think it is not the answer of your research question of involving manufacturing companies, is it?. Also, I did not find any explanations in the text related to industry or company concerns. Perhaps you can do paraphrase the sentence.</li> <li>- In discussion, please write correctly the name as in the citation of the number 21 (Akbar or Akber ?)</li> </ul>	
<b>Optional/General</b> comments	Please recheck the citation and what you stated.	

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)	

**Reviewer Details:**
