

**SDI Review Form 1.6**

Journal Name:	<a href="#">Asian Journal of Research in Biochemistry</a>
Manuscript Number:	Ms_AJRB_54701
Title of the Manuscript:	Effect of a combination of ethanol extract of Ficus capensis and Cnidoscopus aconitifolius on Liver and Kidney function parameters of phenylhydrazine-induced anemic rats
Type of the Article	

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p><b>RESULTS</b></p> <p>-The number of decimal places in each column should be uniform/the same.</p> <p>-The statement in the tables “*mean values differ significantly at <math>p&lt;0.05</math>” is ambiguous. E.g relative to what? or as compared to which group?</p> <p>-It may be necessary to provide the data on the haematological parameters to help in interpretation of the results; it appears that the chemical model (phenylhydrazine) of hematotoxicity induces its effects through a secondary mechanisms ( hepato-nephrotoxicity) not on the hemapoietic tissues. This may indicate that the effect of the phenylhydrazine was on the liver with secondary effects on the haematological parameters thereby reducing its effectiveness as a “true” chemical model of hematotoxicity.</p>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	<p><b>Re-submit for evaluation</b></p>
