<b>Compulsory</b> REVISION comments	<p><b>ABSTRACT</b></p> <p>There should be demarcation of sections and titles aligned to the left margin. What authors consider <b>background and objective</b> should simply be <b>background</b> meanwhile, the study should be put in context. In other words, what is the problem identified with the consumption of the product and what intent to remediate it?</p> <p><b>RESULTS:</b></p> <p><b>Tables:</b> the current form of data presentation is not appreciable; there should be proper alignment and grouping of numbers. In table 1 &amp; 2, authors should highlight categorical variables in bold and harmonize the number of significant figures.</p> <p><b>Language:</b> work is quite interesting but flawed due to issues in the use of elements of grammar. I'll advise authors to carry out a thorough revision of the manuscript.</p>
