Title of the Manuscript:	OCCURRENCE OF HARDENED MATTERS IN THE ANDOSOLIC COVER FROM THE WESTERN HIGHLANDS OF CAMEROON: CASE STUDY OF THOSE RISEN ON TRACHYTE IN THE SOUTHERN SIDE OF THE BAMBOUTO MOUNTAINS
Type of the Article	Original Research Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>English grammar and word usage are very poor. I realize that English is not likely the author's native tongue and that this was a difficult task. Nonetheless, the manuscript was very difficult to read. Such terms as "hardened matters" and "breastplate" are not found in the standard literature – these are mis-translations and need to be changed.</p> <p>A few photographs of the materials would be very useful o the reader. Munsell color descriptions are useful for precision, but actuals photos would assist the reader in seeing the color(s), textures, size, etc. of the material.</p> <p>A paragraph on the effects of the hardened materials on agriculture in the region would be useful.</p>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
