**General guideline for Peer Review process:**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Dear EIC and authors, The manuscript is well written; clear, precise and easy to understand. A very large amount of work was involved in the study, and as far as I can determine, the work is solid. In my opinion, the manuscript fully deserves to be published. However, this manuscript requires minor revisions. I hope that my comments are considered constructive and positive (please, see the file attached).	
<b>Minor</b> REVISION comments	Please, see the file "Ms_ARRB_52578 - revised".	
<b>Optional/General</b> comments	I strongly recommend the authors to replace the title to: "New records of two non native clam species (Bivalvia: Cardiidae) from coastal waters of Bangladesh". The authors do not show evidences for proving the invasions, ie. displacement/extinction of native species.	

**PART 2:**
