

SDI Review Form 1.6

Journal Name:	Annual Research & Review in Biology
Manuscript Number:	Ms_ARRB_53713
Title of the Manuscript:	Side differences in the skull of sheep: an assessment by geometric morphometrics
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The authors presented an interesting manuscript reporting asymmetry on skull of sheep from extensive herds in Spain. However, many aspects should be improved, including some parts that need to be rewritten and figure modifications. The Introduction section is very brief and poorly explored the issue of the study. A very important aspect is the inclusion of a figure illustrating the spatial configuration of landmarks in an extreme asymmetric specimen (or more than one), which could provide the reader a visual reference for asymmetry level and the more asymmetric regions of skull. Many parts that need attention were pointed directly in the manuscript file. Please also check the position of landmarks in Fig.1	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
