PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>On Abstract: Instead of 'The present manuscript was used to evaluate....' Use, 'This study evaluated...' Include conclusion on abstract, but not copy-pasted. On materials and methods, include the necessary punctuation or use your wording appropriately. On sub-topic statistical analysis; '...subjected to one-way ANOVA...' may not be appropriate. Instead, make this a next sentence; 'One-way ANOVA (analysis of variance) was computed to find... on a significance level of $p \leq 0.05$.' On growth parameters, first sentence, just use, 'In this study,' not in this present study. On all statements having 'present study' just make them 'in this study'. Avoid unnecessary repetitions. Make the context structure flow.</p> <p>N/B: Go through the manuscript for additional reviews.</p>	
Minor REVISION comments		
Optional/General comments
