PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Although studies especially with <i>O. gratissimum</i> are not especially rare, I consider the study well conducted and that being the other plant (<i>Gongronema latifolium</i>) is native to the country where the study was conducted, this reinforces the importance of the study.	
Minor REVISION comments	I suggest that just the name of <i>Salmonella typhi</i> , which is a <i>S. enterica</i> serovar, the way to mention the bacteria is now <i>Salmonella Typhi</i> , being italicized <i>Salmonella</i> and <i>Typhi</i> without italics and starting with capital letters. Please correct throughout the text of the manuscript. Another issue is that the scientific names on the figures (bacteria and plants) must be italicized.	
Optional/General comments	I believe it is possible for the manuscript to be published as soon as the suggested corrections are made.	

PART 2:
