PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>The article is well-written and organized. It provides interesting information on the seroprevalence of HSV-2 in undergraduate female students in a specific location of Nigeria and risk factors associated with this viral disease are also indicated. This is useful for taking prevention and control measures. The revision of some minor points is suggested below.</p> <p>Title: delete ANTIBODIES since SEROPREVALENCE implies the search for antibodies</p> <p>ANC: define Be consistent with the abbreviation of herpes simplex 2 ---HSV2 or HSV-2 Please re-write the following sentence at the end of the introduction, Scarcity of information in this regard therefore necessitates this study. In the following sentences please use virus nomenclature abbreviated P = proportion of the population with Herpes Simplex Virus 2 infection from pervious study, Q = proportion of the population without Herpes Simplex Virus 2 infection (1- P) and</p> <p>It would be interesting if the authors can add a line explaining what the tribes are in the following paragraph since readers from other region might not know what is this... Based on tribal distribution, 89 (59.3%) of them were Yoruba, 35 (23.3%) were Igbo, while just only 1 person (0.7%) was Hausa The same comment about the level student 100,200,etc Fig.7 use points instead of comma to separate decimals.</p> <p>Avoid the use of verb contractions it's, doesn't etc.</p>	
Optional/General comments
