SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	NO	
Minor REVISION comments	<p>ABSTRACT</p> <p>. While , age group between >46 recorded 17.5%.patients 33.1% were more infected. <i>You mean older than 46 not between ?</i> <i>Correct the percentage in a right order, there is no sens of the sentence like this</i></p> <p>A significant difference (P<0.05) was observed between patients that used insecticide spray alone as malaria preventive methods, 70.1% and combined methods of prevention 17.2%were recorded.</p> <p>Correct by : A significant difference (P<0.05) was observed between patients that used insecticide spray alone as malaria preventive methods (70.1%) compared to patients that used combined methods of prevention (17.2%).</p> <p>INTRODUCTION</p> <p>approximately 173 million) is at risk of infection. <i>Correct by millions</i></p> <p>An estimated 65% of Nigeria's population lives in poverty and poverty are major factor in malaria prevention and treatment (NMFS,2011). <i>Avoid repetition of "poverty"</i></p> <p>Some children suffer from an acute attack of cerebral malaria that quickly leads to coma and death <i>Add from like here in red</i></p> <p>Table 7:</p> <p>ITNs <i>Wright full words of the abbreviation under the table</i></p> <p>P,0.05 <i>Significant or not ?</i></p>	

	<p>DISCUSSION</p> <p>Put all the references between parenthesis like this (Adenola, <i>et al.</i> 2016)</p> <p>This could be due to rural environmental factors and behavioural pattern of the people</p> <p>Correct by people</p> <p>. This could be the cause of high malarial infection rate observed among patients that used insecticide sprays alone, or could be due to mosquitoes resistance to the chemical or to the low quality of the insecticides and the short duration of the insecticide sprays which lasts for few hours only could be another factor.</p> <p>It is a very long Paragraphe , try to put it in 2 SENTENCES</p> <p>ITNS . The finding is similar to Manyi <i>et al.</i> (2018) who observed that the high prevalence rate could be by chance; child's refusal to sleep under insecticide-treated nets or because of ignorance on the part of their parents concerning the use of insecticide-treated nets which make the more prone to infective mosquito bites Amuta, <i>et al.</i> (2014) observed that good result of this combination of preventive methods could just reflect a synergy between the chemical components against mosquitoes.</p> <p>Add a point after ITNS</p> <p>It is a very long Paragraphe , try to put it in 2 SENTENCES</p> <p>CONCLUSION</p> <p>Malaria is endemic and stable; being a major cause of morbidity and mortality in Nigeria This study has revealed that the malaria infection is considered moderately high compare to other studies.</p> <p>Add point between Nigeria. This</p> <p>Correct compare by compared to</p>	
<p><u>Optional/General</u> comments</p>	<p>NO</p>
