PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1) I would like to see the raw images of HCV PCR bands, PCR results are never represented in tabular format. 2) Raw data of AST and ALT should be presented before and after the treatment. 3) Results should be in graphical presentation with original ALT and AST values and not the ratio of the same. 	
Minor REVISION comments	<ol style="list-style-type: none"> 1) Arrange the data of F1,2,3,4 patients in groups for better representation. 	
Optional/General comments	<ol style="list-style-type: none"> 1) The title of the article and the conclusions do not align. Title says about using fibroscan as a method to study liver damage and the conclusion says about treatment of the disease. Please be consistent in writing. 	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
