PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|---|---|
| Compulsory REVISION comments | | |
| Minor REVISION comments | <p>This manuscript is very interesting, but needs a few adjustments. It would be very enriching if the authors provided a few additional details:</p> <ul style="list-style-type: none"> - Authors should include in the discussion section, the normal clinical course of the leukemoid reaction and how it is managed. - Authors should also include (in the discussion section) a brief explanation of how antenatal steroids are associated to leukemoid reactions (physiologic path). - It would be interesting to provide more details about the studied case. In how many days blood work was normalized, in how many days the baby was discharged from the ICU, etc) | |
| Optional/General comments | | |
