

SDI Review Form 1.6

Journal Name:	International Journal of Medical and Pharmaceutical Case Reports
Manuscript Number:	Ms_IJMPCR_64503
Title of the Manuscript:	Tetanus Adverse Event After Voluntary Medical Male Circumcision for HIV prevention in a pre-circumcision tetanus immunized male from Uganda: A CASE REPORT
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	It is better to explain in more detail about the possible reasons for the failure of preoperative TT vaccination in this case	
Minor REVISION comments	<p>In the abstract: briefly describes the background, case presentation and conclusion. <i>Program Description</i> in abstract should be included in the background</p> <p>In the case presentation, the timing and dosage of TTCV should be written preoperatively</p> <p>In the discussion, some percent efficacy and likelihood of preoperative TT vaccine failure? and list some possible causes of failure from the host factor and vaccine aspects</p> <p>In the discussion, conclusions and suggestions should be described as a closing</p>	
Optional/General comments	I think this is a very interesting case that provides additional information about the possibility of pre surgical tetanus toxoid vaccination failure
