

SDI Review Form 1.6

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	Ms_IRJPAC_54895
Title of the Manuscript:	Removal of Cadmium (II) Ions from Synthetic Wastewaters by alginate – immobilized <i>Penicillium</i> sp biomass
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none"> • Abstract is not matched with the journal format. • The concentration of the adsorbent dosage is not clear mg "per ?". • I think that some sentences are missed in different locations of the manuscript, for example in materials and methods: " They were dried at overnight at 80oC [6]" refers to the medium not the cells. Careful illustration of the methods is required. • Due to confusion, a space should be added to " moldm-3" to be " mol dm-3". • According to the author the adsorbent dosage of 200 mg is not the apex. Adsorbent dosage should increase to the apex. • Also, 150 min is not the apex of the contact time. 	
Minor REVISION comment		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
