PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>There are a few suggestions:</p> <ul style="list-style-type: none"> • The authors should describe senatorial district and local government area for better understanding of readers. • In Table 1, the expected word may be removed from the fifth column. • In page 4 line 69, the reference of treatment guidelines followed may be provided. • The author should mention the prevalent malaria vectors in the study area. • The intervention strategy for vector control and treatment of malaria cases should be provided. • In the light of ongoing intervention measures the reason of high prevalence of malaria should be discussed and a lead for undertaking further work should be provided. <p>The manuscript may be revised accordingly.</p>	
Minor REVISION comments		
Optional/General comments	<p>The study has brought out high prevalence of malaria in rainy season as compared to dry season in Ekiti state, Nigeria. The density of malaria parasite was also found high during rainy season.</p>
