**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	It is a very interesting job. The pollution generated by abattoirs has taken great importance in recent years. The microorganisms that were identified are dangerous to humans.	
<b>Minor</b> REVISION comments	Introduction. The problem of slaughterhouse contamination is detailed very well. Methodology. The place of sampling, the way of collecting the samples and the microbiological analysis are very well explained. The Results are shown very well with the tables presented. The conclusion is correct, no problem.	
<b>Optional/General</b> comments	I suggest that the Discussion be a little more extensive. You should take advantage of his bibliography. I have no problem suggesting that the article be published.
