

SDI Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_65355
Title of the Manuscript:	Index Law of Riemann-Liouville Fractional Derivative, AC-Laplace Transform of Inverse Power Functions and Their Pseudofunctions, and Solution of Euler's Differential Equation, in Nonstandard Analysis
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1. The title of the article is long and doesn't get the point.</p> <p>2. The author discusses three main points in the non-standard analysis, but the article heavily discusses the second point, briefly discusses the third point and does not discuss the first point.</p> <p>3. In Section 3 and Section 4, author discuss the Laplace transform of four kinds of functions, and in Section 5, author tell us the solution of Euler difference equation, but in Section 6, author begin to show the AC-laplace transform and their Pseudofunctions, reviewer think it is inappropriate. May be author can give us the reason.</p> <p>4. Index Law of Riemann-Liouville Fractional Derivative, AC-Laplace Transform of inverse power functions and their pseudofunctions, and solution of Euler's differential equation, there are three point in the paper. Which is the most important, what is the relationship between them and why discuss them in non-standard analysis, the author need give the explanation accordingly.</p> <p>5 The last section of the article is the conclusion, but reviewer don't think it's a summary of it.</p> <p>6 In Section 6, What is the letter 'AC' in AC-laplace transform, which is the relationship about the Laplace Pransform in section 3 and section 4.</p>	1 Index Law of Riemann-Liouville Fractional Derivative....Differential Equation, in Nonstandard Analysis
Minor REVISION comments	no	
Optional/General comments	no	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
