	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	This is an interesting paper entitled Effect of geometry variation on the Mechanical behavior of the proximal femur. Authors used a computer program and the actual data obtained from a person and looked the force, stress and tension on Femur bone. As such this paper has lot of application in bone fractures. It may be useful for future care of femur fracture. So, it is acceptable for publication. However, there are minor concerns, which authors have to answers.	
<b>Minor</b> REVISION comments	<ol style="list-style-type: none"> <li>1) Whether they got approval from Institutional review board?</li> <li>2) They have used data from single person, so there are possibilities for variation taking place between people or between tall and short people. So they should indicate it in the paper by stating that this is a case study of one person.</li> </ol>	
<b>Optional/General</b> comments
