PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This study presents the results of a self-administered questionnaire to evaluate the awareness and knowledge of breast cancer screening methods in a population of women from Al-Qunfudah. The work is easy to read and the results are relevant to improve local health policy.	
Minor REVISION comments	There are some specific concerns which could help improving the manuscript: 1. The manuscript did not specify how was the survey applied (virtual? In person? In a health facility or tertiary school?). It is important to specify this information, which could explain the differences obtained with other similar publications on Saudi women. 2. Comparing the results obtained in the survey with global figures could be beneficial for the discussion	
Optional/General comments		

PART 2:
