Manuscript Number:	Ms_JCTI_63661
Title of the Manuscript:	Hypofractionated radiotherapy using simultaneous integrated boost technique With Concurrent and Adjuvant Temozolomide for glioblastoma multiforme
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In general the manuscript is well done the objectives of the study are clear and results respond to these. The title of the manuscript does not describe the content of the article. Better specify how the sample size was selected for the historical control group. The manuscript explains well the inclusion and exclusion criteria, the authors stated that they received ethics committee approval and informed consent from patients. The data are adequately described, there is no redundancy between tables and text.	
Minor REVISION comments	My suggestion is to better specify the graphic legend because the captions are not well specified. The variable time needs to be better specified; example: time (months) the group 1 to which arm refers, must be specified.	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
