Minor REVISION comments	-	-
Optional/General comments	This research provides a new paradigm about globalization and the dynamics of economic growth in Nigeria. The issue raised was very factual, Nigeria in World Bank figures since the period 1970-2017. The research method used is appropriate using the ex post facto research design to produce global index growth and economic growth indicators. However, we did not find complete data from the government in charge of Nigerian finance. It would be more balanced if added Nigerian data from the government was added.	-
