PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is a very interesting report about an important issue, which is the study of validity of tests used for large-scale assessment, as regional, national or standardized ones. Conceptual framework consists of antecedent of similar studies and theoretical notions that serve to the purpose of organizing the inquiry. Statistical instruments used are appropriate. Conclusions follows from results and recommendations are based upon them. However, Abstract doesn't inform about what test is under analysis. I suggest to include in the Abstract a sentence explaining that final examination (as described at Instrumentation) is the test which is object of this study.	
Minor REVISION comments		
Optional/General comments
