PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1- Chemical analysis is very important and the salt content for each type of sand. It must add to work, because, it can deteriorate both concrete and cement mortar in fresh and hardened states. 2- Very long introduction, it prefers to merge items 1.1, 1.2, 1.3, and 1.4 into a single item. 	
Minor REVISION comments	<ol style="list-style-type: none"> 1- The paragraph "Research significance" should be shortened, and references are not required. 2- Rearrangement of the writing according to publishing requirements. 3- Language needs to correction as they mention 	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
