

**SDI Review Form 1.6**

Journal Name:	<a href="#">Journal of Materials Science Research and Reviews</a>
Manuscript Number:	Ms_JMSRR_64590
Title of the Manuscript:	Experimental and computational analysis of compressive strength of bricks with granite powder and fibres as binder to soil.
Type of the Article	Review Article

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy> )

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The chemical profile of the granite dust was not established. However, from previous works involving Granite dust, silica content is above 70% and alumina content of less than 14% too low to apply as binder. This means that granite dust was added to enhance strength not as binder. Please take note and correct. Please provide equations on how the values for the characteristics of the oil used were computed. Pictures of experimental setups are not as important as the samples pictures. No table of replacement/variation mix showing the soil, the granite dust and the fibre and the replacement percentages. Please include them.	
<b>Minor</b> REVISION comments	Conclusion is too bulky. Please summarise.	
<b>Optional/General</b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	(If yes, Kindly please write down the ethical issues here in details)
