

**SDI Review Form 1.6**

Journal Name:	<a href="#">Journal of Pharmaceutical Research International</a>
Manuscript Number:	Ms_JPRI_59830
Title of the Manuscript:	SELF ASSEMBLING PEPTIDE P11-4 FOR ENAMEL REMINERALIZATION: A BIOMIMETIC APPROACH
Type of the Article	Review

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy> )

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Correct throughout the text the word remineralisation by remineralization.	
<b>Minor</b> REVISION comments	In abstract: in the keywords, Change biomimetics for biomimetic materials; Also change remineralization for dental remineralization In the introduction: Correct the concept: enamel is the hardest tissue in the human body. (enamel is not defined as tissue) You should write the paragraphs fluently with connectors between the ideas in the same paragraph. The use of consecutive points is greatly abused.	
<b>Optional/General</b> comments	As a suggestion: self-assembly drawings of the P11-4 peptide could be included in the enamel to facilitate the reader's understanding.	

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
